Create IBM Watson platform and device

Team ID	PNT2022TMID23214
Project Name	Project RealTime RiverWaterQualityMonitoring And Co

The screenshot shows the IBM Watson IoT Platform dashboard. The main heading is "Browse Devices". Below the heading, there are two tabs: "All Devices" (selected) and "Diagnose". A descriptive text states: "This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API." Below this text is a search bar labeled "Search by Device ID". To the right of the search bar, there is a "Device Simulator" toggle switch (turned on) and two icons (a list icon and a filter icon). The table below has the following columns: "Device ID", "Status", "Device Type", "Class ID", "Date Added", and "Descriptive Location". The table contains one row with the following data: "123456", "Disconnected", "NodeMCU", "Device", "Nov 5, 2022 10:37 AM". At the bottom of the table, there is a pagination bar showing "Items per page 50" and "1-1 of 1 item". On the right side of the dashboard, there is a status bar indicating "1 Simulation running" and "1 new notification".

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
123456	Disconnected	NodeMCU	Device	Nov 5, 2022 10:37 AM	

1 Simulation running

1 new notification
